SUMMARY

Motivated AI/ML Engineer Fresher with strong hands-on experience in machine learning, data preprocessing, and model development using Python. Familiar with ML algorithms, deep learning fundamentals, computer vision concepts, and deployment using Streamlit. Completed real-world ML projects and an industry internship, with a strong passion for learning and applying AI solutions to practical problems.

Education

PDEA'S College of Engineering Manjari BK (SPPU), Pune

Sep 2021 – May 2025

Bachelor of Information Technology

7.69 CGPA

GRP Sabnis Jr. College (Science), Narayangaon, Pune

Aug 2019 – May 2021

Higher Secondary School Certificate

78.00%

Shri Vighnhar Vidyalay, Ozar, Pune

Jun 2018 – May 2019

Secondary School Certificate

77.00%

Technical Skills

Languages: Java ,Python ,SQL, HTML, CSS

ML-DATA : Machine Learning, Data Analytics, Pandas, NumPy, Matplotlib, TensorFlow, Keras, OpenCV

Data And Visualization:: Power BI, Advanced Excel

Tools: Git/GitHub, VS Code, Jupyter, Streamlit, Google Colab

Database: MySQL

Internship

Virtusky IT Pvt Ltd

Dec 2023 – March 2024

Data Science - ML Intern

- Developed and trained deep learning models using TensorFlow for real-world applications.
- Implemented an object detection system to enhance accuracy in image-based search tasks.
- Gained hands-on experience in data preprocessing, model evaluation, and optimization.

Projects

Vendor Performance Analysis | SQL, Python, Power BI, Excel

October 2025

- Analyzed vendor performance data to evaluate key metrics such as on-time delivery rate, order fulfillment, defect rate, and cost efficiency.
- Extracted, merged, and cleaned data from multiple database tables using SQL to create an aggregated vendor performance table.
- Performed Exploratory Data Analysis (EDA) using Python (Pandas, Matplotlib) to identify trends, underperforming vendors, and improvement opportunities.
- Outcome: Improved visibility into vendor performance and enabled data-driven procurement decisions.

Parkinsons Disease Prediction System | Python, ML Algorithm, Streamlit Community Cloud

October 2024

- Data Collection and Preprocessing Gather relevant data features like age, speech patterns, motor skills, and symptoms.
- Train a machine learning model (e.g., Random Forest, SVM) and evaluate performance.
- project contributes to a proactive approach in managing Parkinson's Disease, aiming to enhance patient quality of life and improve outcomes.

Leadership / Extracurricular

NSS

Aug 2023 - May 2025

Volunteer, Coordinator

- Organized and managed various Events and Participated in NSS camps contributing to social welfare initiatives.

ITSA-Committee

Sept 2024 - May 2025

Member

- Organized and managed various technical and non-technical events such as Tech Quizzes, Games and Debates.

Hobbies / Interests

AI Research • Machine Learning • Computer Vision • Generative AI • Fitness • Trekking
